

**Abstracts of the
X Parnas Conference
Young Scientist Forum „Molecules in the
Living Cell and Innovative Medicine”**

**10–12 July 2016,
Wrocław, Poland**

Invitation

Dear Colleagues,

On behalf of the Polish Biochemical Society, the Ukrainian Biochemical Society and the Israel Society for Biochemistry and Molecular Biology, it is our great pleasure to invite you to the jubilee X Parnas Conference, which will be held on July 10-12, 2016 in Wrocław, Poland.

The Parnas Conference is held biannually and gathers scientists from Poland, Ukraine and Israel. It offers a venue whereby current ideas in biochemical and molecular life sciences can be exchanged. The conference honors the memory of Jakub Karol Parnas (1884-1949), a prominent Jewish-Polish biochemist, who made a major contribution in deciphering the glycolytic pathway.

This year's Parnas Conference is aimed at encouraging young scientists to share their ideas and achievements in innovative medicine and all other aspects of molecular biology. The conference will be held in Wrocław, the largest city in western Poland and the capital of Lower Silesia. Wrocław has also been recognised as being the European Capital of Culture and the World Book Capital in 2016. It is called “The Meeting Place” and excites its visitors by the interesting mix of classical and modern architecture, numerous social events and unique pleasant climate. Additionally, Wrocław serves as a great academic and knowledge center with its several renowned universities and research facilities.

You are very welcome to join us and experience the scientific adventure during the X Parnas Conference in summer 2016 in the magical city of Wrocław. We are looking forward to seeing you soon!

Andrzej Legocki,
The Polish Biochemical Society

Serhiy Komisarenko,
The Ukrainian Biochemical Society

Amnon Horovitz,
The Israel Society for Biochemistry and Molecular Biology
