

Supplementary Figure 1. Targeting and regulation of BARD1 by miR-3942-3p. A. relative luciferase assay in CNE1 cells after co-transfected with the psiCHECK-2-BARD1-wt or psiCHECK-2-BARD1-mut along with miR-3942-3p mimics or NC; B. the expression of BARD1 after transfection with miR-3942-3p inhibitor and mimics as compared with NC. ** denote $P < 0.01$ between the columns under the bars, respectively (experiments repeated three times).
